PROFILE

Full-Stack Developer with 3+ years of experience building scalable web applications, analytics platforms, authentication systems, and e-commerce solutions using React, Next.js, Node.js, TypeScript, PostgreSQL, and AWS. Experienced in developing REST/GraphQL APIs, real-time dashboards, secure authentication workflows, and cloud-deployed applications from development to production.

SKILLS

Frontend & Backend	React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux Toolkit, Responsive Design (Mobile-First) Node.js, Express.js, Nest.js, REST API Design, GraphQL, WebSockets, Python, Django, JWT Authentication,
Databases	PostgreSQL, MongoDB, MySQL, and Oracle SQL.
Cloud & DevOps	AWS (EC2, S3), Microsoft Azure, Docker, Vercel, CI/CD Pipelines, GitHub Actions.
Testing & Tools	Git, GitHub, Postman, API testing, and cross-browser testing.
CMS & eCommerce:	Shopify (Liquid), WordPress, WooCommerce, third-party API integrations, and webhooks.
Core Concepts	Agile/Scrum, MVC Architecture, Microservices, Performance Optimization, System Design, Component Libraries, and Clean Code.

CERTIFICATIONS

Udemy - [Full Stack Developer](#)

Education

BS Software Engineering 2024-28 | 5th Semester

Islamia University of Bahawalpur

Projects

Smart Attendance System and Proxy Detector

 [GitHub - MusfirahSheikh8/Smart-Attendance-System](https://github.com/MusfirahSheikh8/Smart-Attendance-System)

Next.js, TypeScript, Node.js, Python, Oracle DB, JWT, OpenCV, dlib, Microservices Architecture

- Engineered a full-stack AI-powered attendance management platform using a microservices architecture with Next.js frontend, Node.js REST APIs, and Python-based computer vision services.
- Implemented real-time facial recognition and anti-spoofing verification workflows using OpenCV, dlib, and facial landmark analysis to reduce proxy attendance and unauthorized access attempts.
- Built secure multi-factor authentication workflows combining JWT-based session management with OTP verification for role-based admin and student access control.
- Developed REST API endpoints for attendance marking, biometric enrollment, OTP validation, authentication, audit logging, and administrative reporting workflows.
- Designed Oracle DB schemas, triggers, stored procedures, and audit-trail workflows to maintain secure attendance history and biometric verification records.

Amazon Barcode Price Scraper

 **GitHub - MusfirahSheikh8/amazon-scrapper**

Python, Amazon Scraping, Google Sheets API, REST Automation, Data Extraction

- Developed a Python-based Amazon scraping automation that retrieves product pricing, ASINs, and metadata using UPC/EAN/ISBN barcode inputs without relying on paid APIs.
- Integrated the Google Sheets API with automated data logging workflows for storing product titles, pricing, ASINs, and scrape timestamps.

Session Security Backend

 **GitHub - MusfirahSheikh8/session-security-backend**

Node.js, Express.js, PostgreSQL, Authentication, Session Management, and Security Engineering

- Engineered a secure session-based authentication backend using Node.js, Express.js, and PostgreSQL with support for session rotation, device tracking, and session revocation workflows.
- Implemented HTTP-only cookie authentication and bcrypt-based password hashing to improve application security and protect against credential exposure and XSS-related attacks.
- Built transaction-safe session rotation logic, ensuring only one active session per user by revoking previous sessions during authentication workflows.
- Designed PostgreSQL session management schemas for user authentication, device tracking, session lifecycle handling, and revocation auditing using UUID-based session identifiers.

Live Crypto Dashboard

Vercel: <https://live-crypto-dashboard-five.vercel.app>

 **GitHub - MusfirahSheikh8/live-crypto-dashboard**

React, TypeScript, Redux Toolkit, WebSockets, Chart.js, Real-Time Data Streaming

- Developed a real-time cryptocurrency dashboard using React, TypeScript, and Redux Toolkit with live market updates streamed directly from the Binance WebSocket API.
- Implemented WebSocket-based data streaming architecture to process and display real-time cryptocurrency price updates without requiring page refreshes.
- Built centralized global state management using Redux Toolkit and React Redux for scalable handling of live pricing data, UI state, and dashboard interactions.
- Structured scalable frontend architecture using Vite, custom React hooks, feature-based Redux slices, and WebSocket abstraction layers for maintainable real-time application development.

User Analytics Tracker

 **GitHub - MusfirahSheikh8/User-Analytics-Tracker**

React, Node.js, PostgreSQL, REST APIs, analytics pipelines, and Data Visualization

- Developed a full-stack user analytics tracking platform inspired by Google Analytics and Mixpanel, enabling event ingestion, session tracking, data aggregation, and dashboard-based analytics visualization.
- Built a scalable analytics event pipeline using React, Node.js, Express.js, and PostgreSQL to capture and process user interactions, including clicks, page visits, and session activity.
- Designed REST API endpoints for analytics ingestion, aggregated reporting, session statistics, and event-based dashboard insights using optimized PostgreSQL query workflows.
- Structured PostgreSQL analytics schemas with indexed queries and JSONB metadata storage for scalable handling of flexible event payloads and time-series analytics data.

EXPERIENCE

OOZE Bath — Shopify Developer

<https://oozebath.com>

Production-commerce storefront | Liquid, HTML5, CSS3, JavaScript, Shopify APIs | Solo build | 2024

- Engineered and deployed a production-ready Shopify storefront for a live beauty e-commerce client using Liquid, HTML5, CSS3, and JavaScript, delivering a mobile-first shopping experience across a growing catalog of 5+ beauty and wellness SKUs.
- Rebuilt product page templates and lazy-loaded asset delivery, cutting page load time by ~35% and improving product discoverability through restructured navigation and search.
- Integrated Shopify Payments and 3 third-party apps—inventory management, checkout flows, and order tracking—which reduced the failed transaction rate from ~8% to under 1%.

Extron AI, Bahawalpur, Pakistan

Full Stack Developer | Sept 2025-Dec 2025

- Developed scalable full-stack web applications using React.js, Next.js, Node.js, TypeScript, PostgreSQL, and MongoDB across multiple client and internal projects.
- Built responsive frontend interfaces and reusable UI components to improve consistency and maintainability across dashboard and web application modules.
- Designed and integrated RESTful and GraphQL APIs for authentication workflows, real-time data handling, and frontend-backend communication.
- Optimized application performance through efficient state management, database query optimization, and scalable API integration workflows.

Gigledger - UI/UX Designer & Frontend Developer

<https://staging.gigledger.co.uk>

SaaS invoicing & timesheet platform | React.js, CSS3, REST API | Client project | 2025

- Designed and built a complete SaaS UI for a client's timesheet and invoicing automation platform using React.js, translating complex financial workflows into a dashboard that reduced average task completion time

by ~25% across 10+ views.

- Architected 8 landing pages and dashboard layouts with a consistent component library and clear CTA placement, which the engineering team shipped with zero design revision cycles.
- Delivered a fully developer-ready interface—with documented component specs and REST API integration points—directly to the client's engineering team on schedule.

Lumiere Auroras - Shopify E-Commerce Storefront Developer

<https://lumiereauroras.com>

Shopify, Liquid, HTML5, CSS3, JavaScript | Solo Project | 2026

- Engineered and deployed a production-ready Shopify storefront for a luxury fragrance and beauty e-commerce brand using Liquid, HTML5, CSS3, and JavaScript.
- Customized Shopify themes, product templates, collection pages, and storefront components to improve UI consistency and customer navigation workflows.
- Integrated payment gateways, checkout workflows, product reviews, wishlist systems, and third-party Shopify applications.
